

Heavy

CUPA NATURAL SLATE

Certificate number: 12/12

Cupa Pizarras S.A is delighted to offer this guarantee certificate for the Heavy 3 natural slate affixed to the roof of the project detailed below. The certificate covers a period of one hundred years from the date shown and is conditional on the slate being fitted in accordance with the British Standard Code of Practice 5534.

All quarries currently operated by the Cupa Group are endorsed in those countries where such authorisation is mandatory. Our quality management system is in compliance with ISO 9001:2000 (certified by AENOR and AFNOR).

The blue black Heavy 3 natural slate comes from the Group's Cupa 3 quarry located in San Pedro de Trones (Leoni in northern Spain. Since 1892 this quarry has produced a distinctive riven-faced natural slate which conforms to the French NF standard, the British Standard BS 680 Part 2 and the CE mark which in turn complies with the European Specification BSEN12326.

Heavy 3 adheres the following performance criteria:

-  Impermeable to water.
-  Weather and UV resistant.
-  Chemically resistant.
-  Undamaged by fungi, moss, insects, animals or birds.
-  Maintains its colour over time.
-  Non-combustible.

Traceability:

Name: HEAVY 3

Size: 40X20 ph

Quantity: 4100 units

Date of Manufacture: 29/04/2011 2010018097

Work Complete by:

GRAHAM POW

Project Address:

MIDMAR GARDENS, EDINBURGH
